

IEEE Student Branch Meeting Minutes:

Members in attendance:

Emily, Andre, Brandon, Devyn,

Monday October 31

MARS DRAO field trip:

Naomi has contacted DRAO, but they have ended tours for the year.

Andre has agreed to ask around at the observatory for scientists willing to give a seminar on campus.

Are Wednesday afternoons workable? Most members agree to Wednesday afternoon for a field trip time. However, the site closes around 5PM (not fixed), so the earlier we can leave campus the better

Brandon will draft an email to MARS members announcing the field trip on the 23 of November. 1.5 hour drive to and from the observatory.

Second Matlab seminar has been moved back a week to November 16 from November 9 to accommodate Hadi Firouzi., the new presenter. He will be giving a talk on object oriented programming in matlab.

Members in attendance agree that an ICF grant to support the new printer would be very practical. Currently the printer has been funded by the MLRC grant. It is a learning centre upgrade grant, so it could be used for millwork or equipment as well.

Contact Miguel about getting the paperwork together and started.
